WORK ZONE SAFETY PROGRAM

What is a work zone?

A designated area of a highway or street where construction, maintenance, or utility work is taking place, marked by signs, barriers, or pavement markings.

Why does work zone safety matter?

Work zones are especially dangerous for drivers. Protect yourself, your passengers and highway workers.

Traffic violations, such as speeding and failing to obey signs, can result in jail time and license suspension.

Take our course to learn more! We created a free, 35-minute online course to help you drive safely through a work zone.
